

Tripod DA 150 K

SKU: 6132

Sachtler DA 150 K aluminium Tripod for
150 mm Fluid Heads

PRODUCT DESCRIPTION

Getting the best results means going wherever the perfect shot is, even if that is only just above the ground. The Sachtler DA 150 K aluminum Tripod is designed to give you high levels of performance and stability for extremely low shooting positions of 15- 39 cm. Supporting a maximum payload of 40 kg means that getting this low doesn't have to come at the expense of performance.

The head features a 150 mm bowl base, while the rotary clamping system lets you get to work quickly with confidence that your camera is securely in place. Weighing just 3 kg and with a transport length of 32 cm, the Sachtler DA 150 K opens up a range of new possibilities without taking up excessive space. The aluminum design means this tripod will be a reliable working partner, no matter where you take it.
