

# flowtech Rotating Carry Handle 75 mm / 100 mm

Part No. S2051-1062

## Supplied Parts

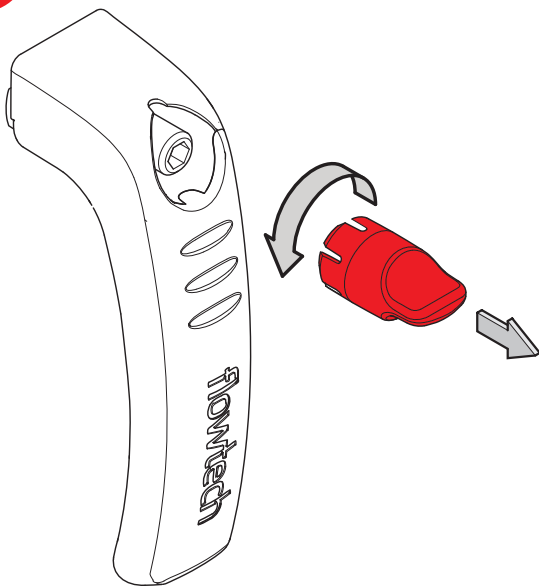

## Fitting Handle

**Note!** Take care to align threads properly whilst fitting to avoid causing damage to parts.

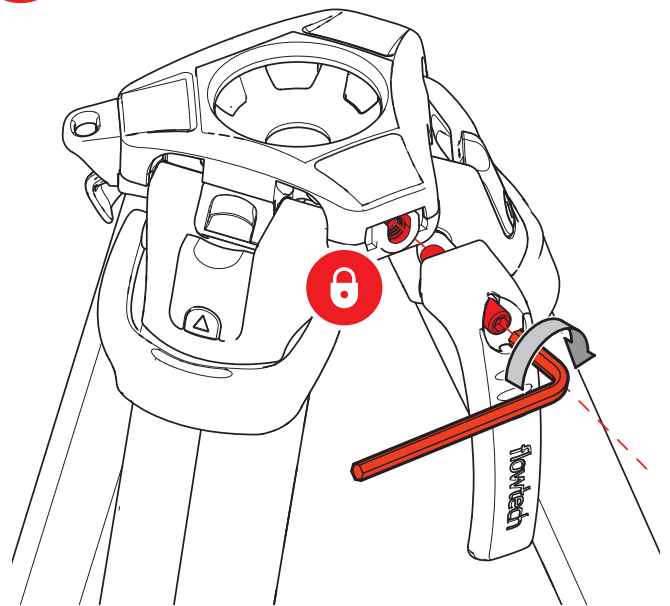

1

Unscrew the Lock Knob and remove from the handle.

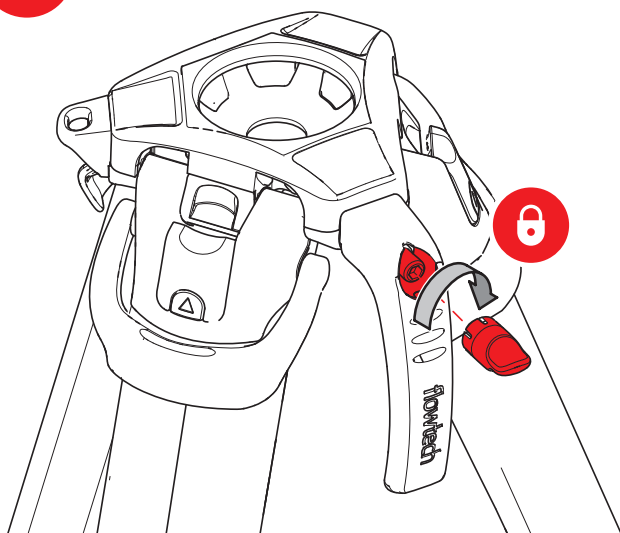

2

Use the supplied Hex key to screw the handle to the tripod mount. Firmly tighten.

3

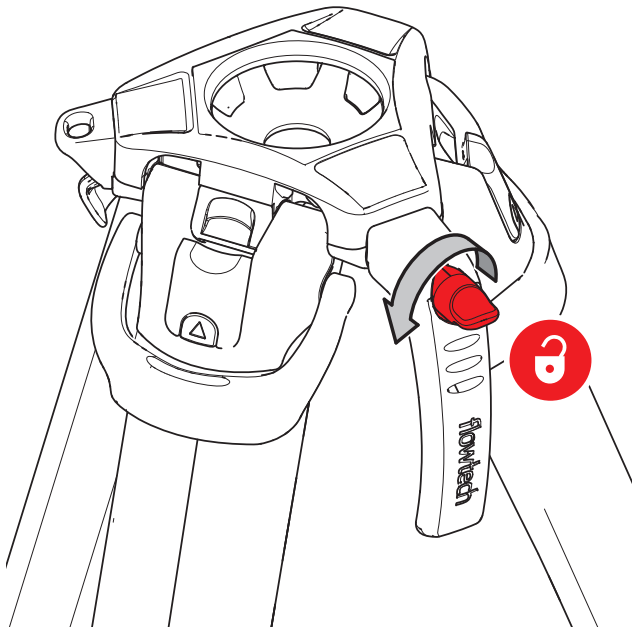

Screw the Lock Knob back onto the handle turning clockwise.

## To Move Carry Handle to Horizontal Position

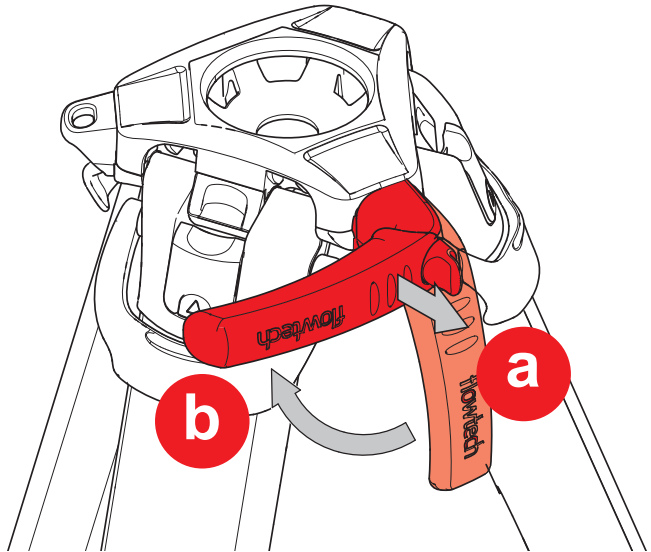

1

Loosen the Lock Knob, approximately three turns anti-clockwise.

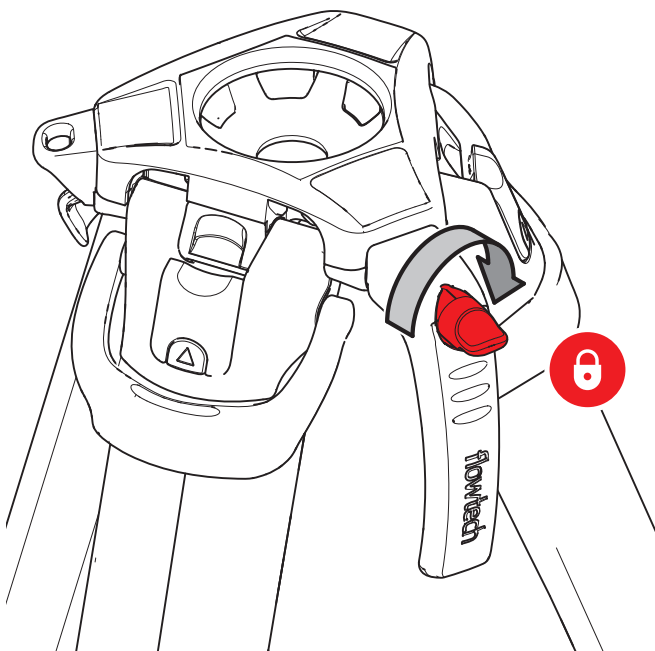

2

Pull the handle away from the tripod (a). Rotate the handle into the horizontal position (b) and release. The handle will remain in place under spring pressure. The tripod may now be used in the lowest position.

3

To place the handle back into the carry position: Rotate the handle back into the lock position and tighten the Lock Knob.
